Subject: Site Characterization and Removal Action for Polychlorinated Biphenyls at
Building 237, Investigation Area D1, Mare Island, Vallejo, California

Dear Ms. Bisson:

Enclosed is the Site Characterization and Removal Action for Polychlorinated Biphenyls at Building 237 Summary Report. CH2M HILL prepared this document in compliance with the Consent Agreement/Final Order (CA/FO) between United States Environmental Protection Agency (USEPA) and the United States Department of the Navy, with the City of Vallejo and Lennar Mare Island (LMI) as intervenors. The CA/FO sets forth the polychlorinated biphenyl (PCB)-related requirements that must be met to satisfy the Toxic Substances Control Act (TSCA) for the Eastern Early Transfer Parcel (EETP) of Mare Island. The purpose of this document is to obtain USEPA concurrence that a no further action (NFA) determination is appropriate for this former transformer pad site with respect to PCB contamination as part of the overall regulatory closure process for the EETP of Mare Island.

Please submit your approval of NFA at this Building 237 PCB site to me at the above address or via e-mail at jmorris1@ch2m.com by March 19, 2004. If you have any questions regarding this site, please contact Carla Duncan at 775/329-7238, extension 220.

Sincerely,

CH2M HILL

for
Jeffery C. Morris, PE

Subject: Site Characterization and Removal Action for Polychlorinated Biphenyls at
Building 1322, Investigation Area D1, Mare Island, Vallejo, California

Dear Ms. Bisson:

Enclosed is the Site Characterization and Removal Action for Polychlorinated Biphenyls at Building 1322 Summary Report. CH2M HILL prepared this document in compliance with the Consent Agreement/Final Order (CA/FO) between United States Environmental Protection Agency (USEPA) and the United States Department of the Navy, with the City of Vallejo and Lennar Mare Island (LMI) as intervenors. The CA/FO sets forth the polychlorinated biphenyl (PCB)-related requirements that must be met to satisfy the Toxic Substances Control Act (TSCA) for the Eastern Early Transfer Parcel (EETP) of Mare Island.

The objectives of the 2003 cleanup action were achieved, and the PCB site at Building 1322 meets the criteria for no further action (NFA) under TSCA following recordation of the appropriate land-use covenant. Therefore, the purpose of this document is to obtain USEPA concurrence that an NFA determination is appropriate for this site with respect to PCB contamination as part of the overall regulatory closure process for the EETP of Mare Island.

Please submit your approval of NFA at this Building 1322 PCB site to me at the above address or via e-mail at jmorris1@ch2m.com by March 19, 2004. If you have any questions regarding this site, please contact Carla Duncan at 775/329-7238, extension 220.

Sincerely,

CH2M HILL
